

Updates

1. User info doesn't update when new users create accounts, the admin only see his account listed instead of seeing every account
2. Language translation doesn't work on dashboard, profile, winning product, you should translate all the components of each page
3. Dashboard tab in the admin side is not live
4. The plan button in the bar is permanently showing free, even if the plan has changed
5. Profile drop is not live it always showing my address even though a new user is logged
6. The csv import feature isn't working, it import successfully but doesn't add the data to the DB, on add supplier form add the contact url input, from platforms add xianyu, add category and product he supply for supplier
7. I have a row level security when trying to add suppliers and winning product
